SITE HEALTH AUDIT · NOVEMBER 2026

princess.com site health report

Broken pages, placeholder text, typos and data gaps found in a read-only crawl of the public site

Crawled November 2–3, 2026 · 8,016 sitemap URLs · 773 pages read in full · 5,109 shore excursions

SCOPE

What we checked

8,016

URLs listed in Princess's own sitemap, sorted into 33 sections

5,091

sitemap URLs and on-page links checked for errors and redirects

773

pages read in full: destinations, ships, dining, deals and help

5,109

shore excursions across 471 port pages, with prices and ratings

Read-only: no logins, bookings or form submissions. Pages that robots.txt asks crawlers to skip (deal fine print, individual excursion product pages) were not checked.

THE HEADLINE NUMBERS

The site is up and fast. The problems are in the content.

0

lasting server errors. One 502 cleared on retry. Median response 0.9 s.

5

visible page-breaking bugs, from a blank page to a link into a test site

270

broken links on 130 pages, pointing to 81 missing pages

30+

misspellings and grammar errors in published copy

SUMMARY

Every issue, ranked

Issue	Pages	Severity
Payment Plans and Additional FAQ pages are blank	2	High
“View all deals” button opens an internal test copy of the deals page	26	High
Cruise cards show “From {{fare}}” instead of a price	8	High
Norway & Iceland region page is gone; its ports still link to it	14	High
Placeholder copy: “Test by line…”, Lorem Ipsum	2	High
Other broken links to missing pages	116	Medium
Port guides that redirect to a generic page	14	Medium
Misspellings in published copy	26	Medium
Excursion and ship data that doesn’t add up	30	Medium
Search basics: missing descriptions and headings, outdated sitemap	87+	Low
Grammar, tone and hidden characters	28	Low

MAJOR ISSUE · HIGH SEVERITY

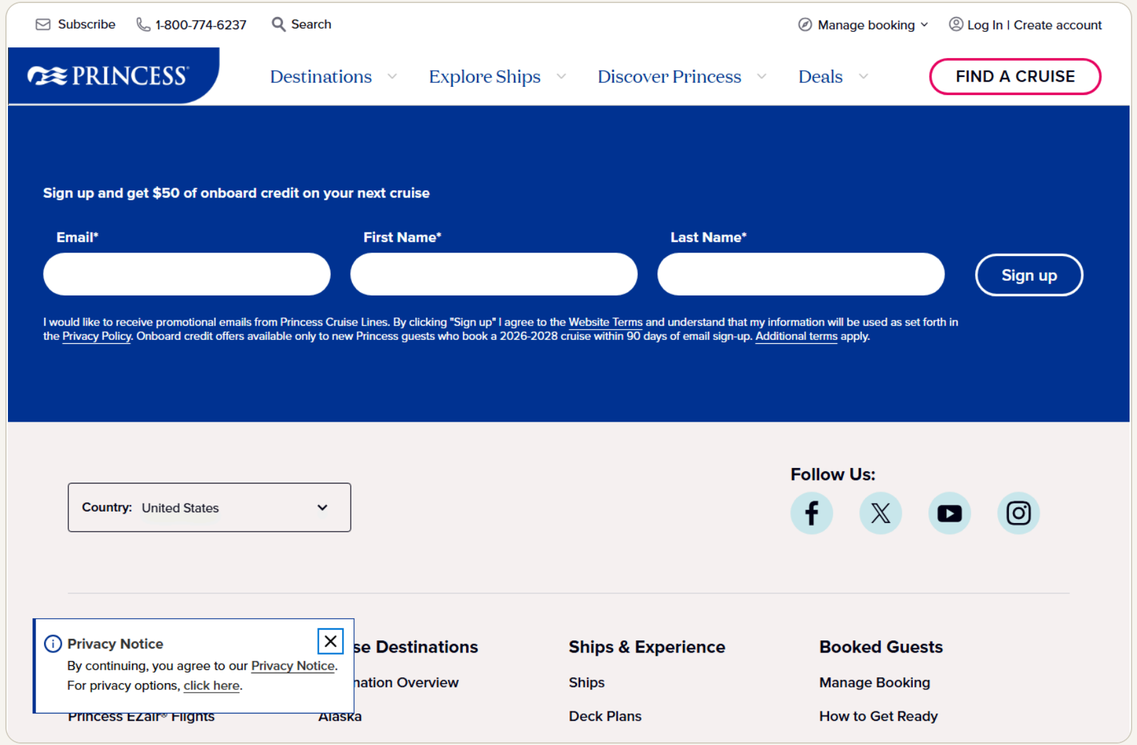

The Payment Plans page is blank

Where: /cruise-deals-promotions/payment-plans, titled “Flexible Pay Monthly Options for your Cruise”

What visitors see: the site header, an email signup and the footer. No content at all.

Also blank: /faq/additional-faq

Fix: restore the content, or redirect to a working payment-options page.

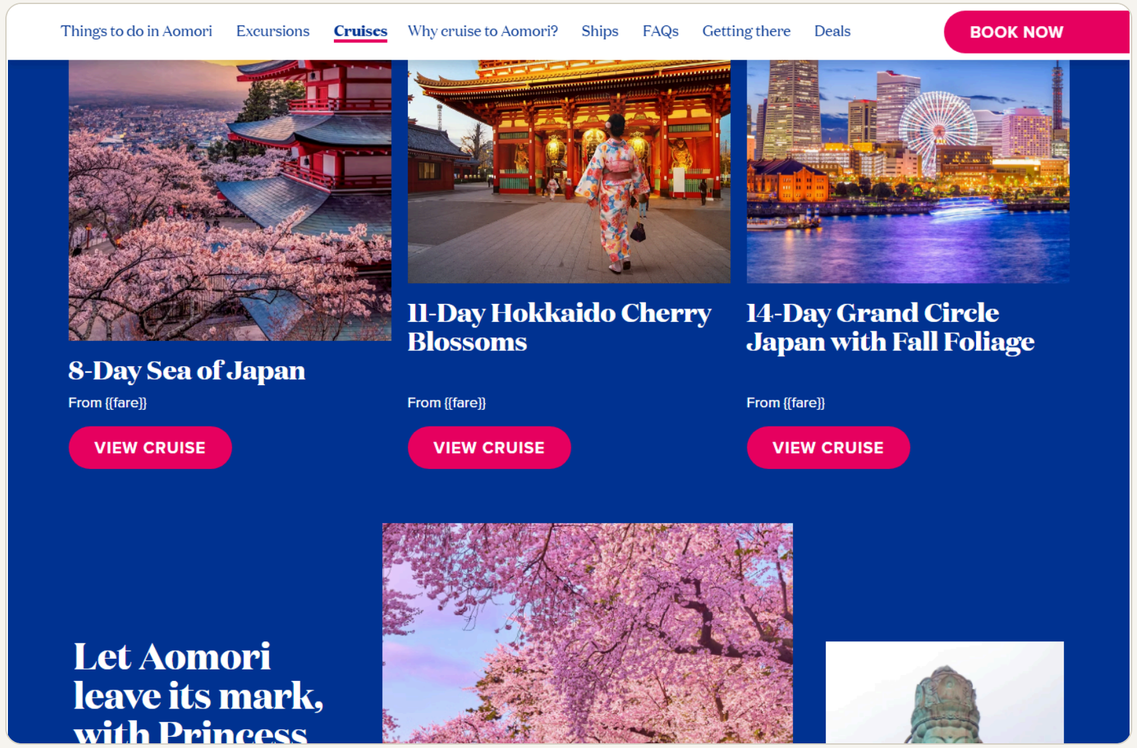

MAJOR ISSUE · HIGH SEVERITY

Japan pages show “From {{fare}}”

What visitors see: a raw template code where the starting price should be, on 23 featured cruise cards.

Where: 8 Japan port pages: Aomori, Beppu, Hiroshima, Hitachinaka, Kanazawa, Tokushima, Tsuruga and Wakayama.

Fix: check why the fare isn’t filling in for these cruises, and hide the price line when no fare is available.

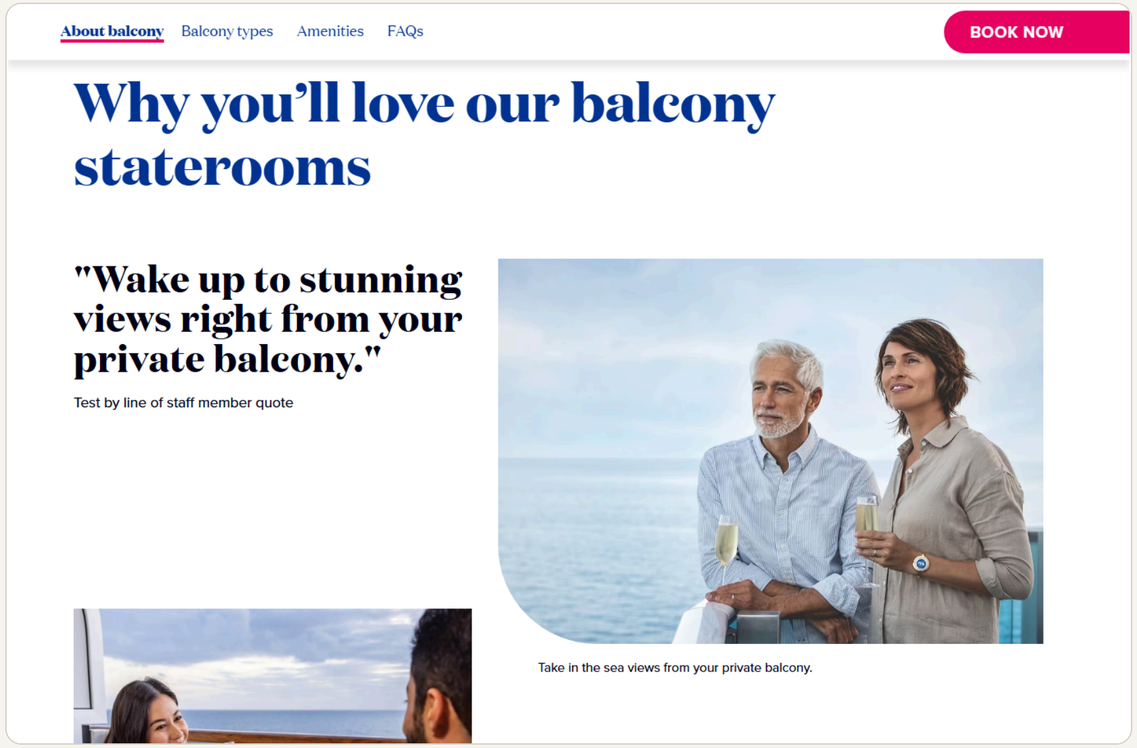

MAJOR ISSUE · HIGH SEVERITY

Placeholder text went live

Balcony staterooms page: the quote attribution reads “Test by line of staff member quote”.

Blog home page: a full “Lorem ipsum” passage sits in a collapsed video transcript. It’s hidden on screen, but search engines and screen readers read it.

Fix: replace both with real copy and add a pre-publish check for “test”, “lorem” and “{{”.

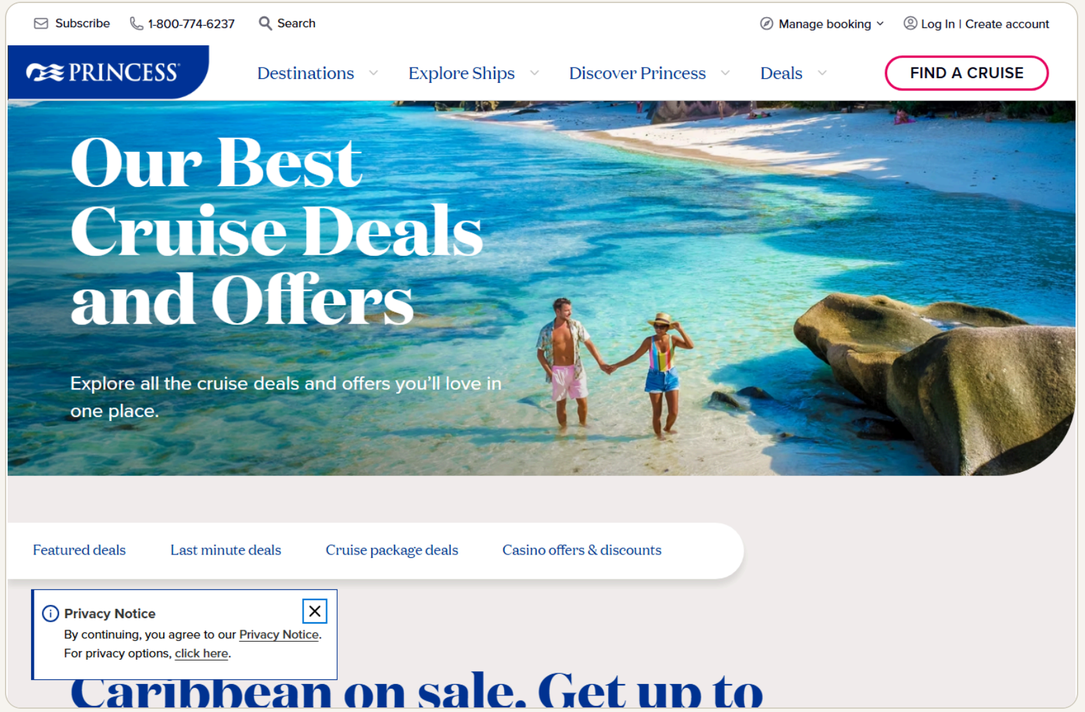

MAJOR ISSUE · HIGH SEVERITY

Live pages link into a test site

“View all deals and promotions” on 26 port pages (Australia, Europe, South America, departure ports) opens /qa-test-area/cruise-deals-promotions, an unmaintained copy titled “Cruise Deals 2025-2026”.

Also: 35 more links into /qa-test-area/, /demo-pages-reference/ and /language-masters/ on 11 pages, including San Francisco, Vancouver and Aomori. All return “page not found”.

Fix: re-point to /cruise-deals-promotions and block test areas from public access.

MAJOR ISSUE · HIGH TO MEDIUM SEVERITY

270 links lead to “page not found”

Missing page	Linked from	Links
Norway & Iceland region page	Bergen, Oslo, Reykjavik and 11 more	14
Japan blog: Imperial Palace; Tokyo gardens	Japan port pages	52
Japan blog: three must-see cultural attractions (2 URLs)	Japan port pages	26
South Pacific tips: Moorea day trip; Fijian culture	Asia and Pacific port pages	39
Blog: Stockholm from a unique perspective	British Isles and Europe pages	18
Mexico tips: cliff divers; Cabo San Lucas	Mexican Riviera pages	13
Getaway cruise tips (4 articles)	Pacific Coast getaways	16

In all, 81 missing pages are linked 270 times from 130 live pages. Most are retired blog and “cruise tips” articles still linked from port-page carousels.

MAJOR ISSUE · MEDIUM SEVERITY

Port guides that redirect to a generic page

7 guides → the destinations home page

Seward, Valdez, Wrangell, St. Vincent, Galveston (a departure port), Kumano and Epic Voyages all land on /cruise-destinations. A visitor looking for Seward gets a general list instead.

7 “cruise tips” hubs → the blog

Alaska, Asia, Australia, Mexico, Panama Canal, South America and South Pacific cruise tips all redirect to /blog, losing their region focus.

Fix: point each old URL at the closest matching page, such as the Alaska region page or a blog category, and update the menus and links that still use the old addresses.

COSMETIC · MEDIUM SEVERITY

Misspellings on ship, dining and help pages

Page	As written	Should be
Accessibility at Sea (heading, twice)	Accessible accomodations	accommodations
Dining › O’Malley’s Irish Pub	…ribeye patty, friend shrimp	fried shrimp
Ships › Sapphire Princess	A luxurious dinning experience	dining
Why Princess › New to Cruising	Book your next cruiste	cruise
FAQ › Flight guideline ports	prior to ship’s depature	departure
Onboard activities	music and dancng lessons	dancing
Casino › Slot tournament series	Bahamas saliing on 1/23/27	sailing
Celebrations › 6 ways to celebrate	chocolate inspiried dessert	inspired

COSMETIC · MEDIUM SEVERITY

Misspellings on destination pages

Page	As written	Should be
Cruises to Sydney, Nova Scotia	ydney delivers a relaxed…	Sydney
Cruises to Roatán	nature park & scenic rrive	drive
Cruises to Puerto Rico	Caribbean cuise onboard	cruise
Cruises to Aarhus (2 pages)	View excusrion	excursion
Cruises to Celebration Key	signiture italian dishes	signature Italian
Cruises from Florida	a little signatire Miami heat	signature
Cruise to Juneau	the souring comfort of…	soaring
Cruises to Stanley, Falklands	the southern helisphere	hemisphere
Cruises to Port Vila	coral reefs teaming with fish	teeming
Cruise to Trinidad	the busting streets	bustling

Also: “pmaybe” (Kobe), “capper” for caper (Tokushima), “tactually” (Valletta), “carpel tunnel” (Australia tips).

COSMETIC · LOW SEVERITY

Grammar, tone and hidden characters

“Your voyage will chock full of exciting ports”

Alaska sailing deal page (2 pages): missing “be”

“Whether it’s a birthday to anniversary…”

FAQ and 2 other pages: should be “birthday or anniversary”

“Athens is a city for thinker’s”

Cruises from Athens: stray apostrophe. Hawaii tips also has a broken sentence: “the spectacular and Hilo volcanos”

“…pubs singing pissed-off ballads”

Cruises to Belfast: worth a brand-tone review for a family audience

Hidden characters: 22 headings and buttons are padded with invisible marks, for example 32 after “Front-Row Seat to Unparalleled Views”. Screen readers can stumble on them, so use spacing styles instead.

SEARCH VISIBILITY · LOW SEVERITY

Search basics need tidying

25

pages with no meta description, including 6 dining venues such as Umai Hot Pot and The Eatery

50

page titles over 70 characters, which Google cuts off in results

12

pages with no main heading (H1), including Flash Sale, EZair and Europe Sailing

The sitemap is out of date

It lists 33 pages that no longer exist and 341 that redirect elsewhere, 224 of them old cruise-search URLs. Separately, menus and links still use 2,240 old “/ports-excursions/” addresses, which add a redirect to every click.

DATA ACCURACY · MEDIUM SEVERITY

Data that doesn’t add up

Ports with “No excursions found”

154 of 471 port pages list no tours. For 18 of them the sitemap still lists tour pages, for example Broome (15), Picton (13) and Timaru (13). Kotor shows 2 of 30.

Island Princess capacity

“2,200 guests” but “987 guest cabins”. Every other ship lists about 2 guests per cabin, which would make about 1,974. Worth confirming.

Excursions missing a duration

8 tours have no length, including Barcelona Hop-on Hop-off and Powerscourt Distillery (Dublin).

Duplicate excursions

3 tours appear twice at the same port under two URLs: Astoria, Ketchikan and Taipei.

RECOMMENDATIONS

What to fix, and when

This week

- Restore the Payment Plans page
- Re-point the 26 test-site deal buttons
- Fix the {{fare}} cards on Japan pages
- Remove “Test by line” and Lorem Ipsum
- Restore or redirect Norway & Iceland

This month

- Redirect the 81 missing pages
- Correct the 30+ typos
- Point retired port guides at real pages
- Check excursion and ship data
- Regenerate the sitemap

Ongoing

- Re-run this audit monthly
- Pre-publish check for “test”, “lorem” and “{{”
- Block test areas from the public
- Add missing descriptions and headings

APPENDIX

How this audit was done

Method

- Sitemap and robots.txt read on November 2
- Pages opened in a real browser, 1–2 at a time with pauses
- Status of every URL checked, following redirects
- Copy scanned for template code, placeholder text and near-miss spellings, then reviewed by hand
- Every major issue re-checked live on November 3

Limits

- Pages robots.txt disallows were skipped
- Booking, search results and account pages weren’t audited
- The spelling scan finds near-miss words, not every grammar error
- Prices weren’t checked against booking
- A snapshot in time: one flash-sale typo was fixed during the audit
